Dominique von Orelli

Executive Vice President Global
Head of Ocean Freight DHL
Global Forwarding

This document confirms participation in the DHL GoGreen Plus Service. The greenhouse gas emissions generated by transportation will be reduced via Scope 3 carbon reductions resulting from the usage of sustainable fuels in accordance with book & claim mechanism as developed in concepts by the World Economic Forum and the Smart Freight Center. The actual emissions reduction will be verified by SGS (Société Générale de Surveillance) every year and approved by means of an official certificate.
